

JOINED UP THINKING FOR SEAMLESS SOLUTIONS

Infor EAM (Enterprise Asset Management) joins up all your business functions and sites, ensuring you effectively manage, maintain and track your operational assets – critical to all stages of exploration and production.

At Progressive, we understand how critical it is for your business to maximise the benefits whilst minimising costs. That is why we have developed a template EAM configuration providing best practice oil & gas functionality for inventory, supply chain, contracts and maintenance management. We also have ready-built interfaces from EAM to SunSystems and other companion products.

10 BUSINESS CRITICAL OIL & GAS FEATURES

- Full integration with your existing finance system
- Total visibility in one system of multiple business entities
- Contracts and supply chain management
- Inventory/warehouse management
- Preventative/reactive maintenance
- Performance monitoring and alerting via dashboards
- Mobile device support and multiple language formats
- Streamlining of asset management processes
- Resource management and planning
- Through life asset costing and renewal planning

“Progressive demonstrate an exceptional level of commitment to developing solutions that suit our needs and they frequently go the extra mile to ensure projects are delivered successfully. Every member of the Progressive team is conscientious, professional and genuinely knowledgeable – their approach and attitude towards the delivery of their work has made it easy for us all to enjoy the journey.”

EDWARD SKENE

Vice President Finance & Business Support, Seplat

IMMEDIATE BENEFITS. AT A GLANCE

- More efficient procurement with consistent auditable approvals and budgetary controls
- Easy to search inventory for full view of all stock across all warehouses in all locations
- Material Replenishment Process (MRP) function to maintain operational stock levels for 'mission critical' maintenance spares, reducing unnecessary manual requisitions
- Production down time minimisation through preventative and reactive maintenance by overlaying planned work to minimise outages
- A single, real time view of assets, enabling better decisions on purchasing, maintenance and storage, and ensuring maximum ROI
- Reduced maintenance costs, proactive maintenance to identify ailing components and maintain, repair or replace before failure
- Fully scalable solution, grows with your business and links many best-of-breed oil & gas systems and tools such as hand held barcode scanners
- Highly adaptable workflow enables you to mirror existing Delegation of Authority in EAM
- Mobile access utilising tablets and other handheld devices meaning data can be entered and viewed on site in real time or 'store & push' where network coverage is limited
- Resource utilisation visibility for effective ratios of resource: 'Windshield time' vs 'Wrench time' vs 'Admin time'
- Capture and analyse asset downtime (planned vs corrective vs breakdown time) to drive improved maintenance practices and increase asset uptime

"Progressive's flexible approach has accommodated our working patterns. They're willing to work around us, picking tasks up as we have time to work on them, which makes things easier to manage."

PATRICK KENNEDY

Chief Financial Officer, Hansa Hydrocarbons

WHAT IS INCLUDED IN EAM?

Infor EAM includes all the functionality an oil & gas company needs to effectively manage its assets. The functionality can be delivered all together, or as part of a phased roll out over time. Progressive have implemented EAM for both large and small E&P companies in Africa, Europe and North America. Projects have included standard functionality such as supply chain, inventory, contracts and maintenance management, as well as bespoke functionality developed to meet an individual company's requirements.

Manage your Assets and Inventory

EAM allows you to track and manage all assets. It provides full visibility of what you have got and how it is performing, enabling you to improve asset utilisation and ensure maximum performance and minimum disruption.

Manage your Resource

EAM can record working time for all employees, including temporary and contracted staff. Analysis can be by nature of work and specific assets working on, enabling you to see where your resource time is being spent.

Manage your Business Process

EAM enables you to manage your Asset Management processes more effectively, streamlining activities, eliminating duplication and reducing manual activities and paperwork. EAM can be configured to target safety and efficiency – it will work as a risk management driver, integrating robust Health, Safety, Security and the Environment (HSSE) Management.

Manage your Maintenance

EAM can provide an aggregated view of the maintenance schedules and the life expectancy of all parts. This enables you to determine the least disruptive time to perform inspections and proactive maintenance, minimising downtime and maximising equipment efficiency.

Analytics

We can provide a single dashboard for all financial and operational data for a consolidated view of expenses and commitments. Automatic generation of custom reports can also be implemented.

Interoperability

Additions can include barcode scanners in warehouses, PCs in the office, iPads in the boardroom, ensuring EAM is accessible through an appropriate device no matter what location you are in.

ABOUT PROGRESSIVE

We are the only consultancy dedicated to providing Business Solutions to the oil & gas industry, specialising in Finance, Supply Chain and Asset Management.

We help our clients successfully achieve their planned outcomes and maximise the benefits from system implementations, working in partnership to consider aspects beyond the system, such as process and controls.

We build strong relationships with our clients to ensure we get it right first time.

Our approach has achieved recognition – we are an Infor Gold Channel Partner, and have successfully delivered the highest Infor Partner revenue in Enterprise Asset Management across EMEA.

WHAT WE DO

- Consultancy
- System Review
- System Design
- System Implementation/Upgrade/Integration
- Knowledge transfer and End User training
- Ongoing Support
- Hosting, SaaS and Cloud solutions
- Outsourced finance solutions

THE RESULT?

We build lasting relationships

We deliver impressive results

And, we always look to change the game for our clients
