Release Highlights

Closing Codes with categories, PO receipt translations, Auto-save Dynamic Checklists and more

Voice of Customer

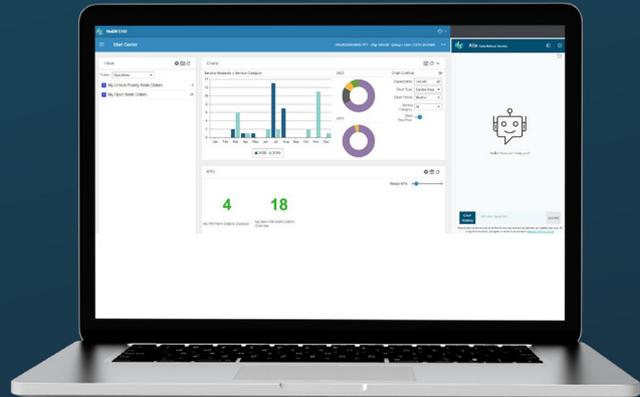

Customer suggested product improvements and enhancements requests

HxGN Alix

Your Personal Assistant for Asset Lifecycle Intelligence

Introducing HxGN Alix – Hexagon’s new AI assistant specifically tailored to boost the efficiency of HxGN EAM users. Now accessible from the HxGN EAM toolbar, HxGN Alix provides essential assistance and practical solutions to accelerate performance and simplify operations.

HxGN Alix is designed following a carefully orchestrated ‘crawl before you walk’ approach, placing crucial focus on delivering foundational value before advancing to manage complex cases. This approach underscores Hexagon’s commitment to delivering an AI solution tailored to meet customer needs and unique circumstances in the future. With robust data security protocols and an emphasis on data accuracy, HxGN Alix minimizes your risk exposure while delivering accurate, high-performance results.

Use Cases:

- Provides convenient, dependable support on the effective use of HxGN EAM’s features
- Simplifies code generation by writing Python scripts on your behalf using a library of code available in Python Studio
- Advises on industry processes, regulations, and specifications

What’s the Value:

1. **User Assistance and Development:** With HxGN Alix, users can deepen their understanding of the product, learn new functionalities and keep up-to-date with ongoing enhancements. This leads to better utilization of the product, improved efficiency, and increased productivity.
2. **Enhanced Efficiency and Autonomy:** HxGN Alix helps customers to be more self-sufficient. They can independently navigate the system, troubleshoot issues, and generate codes without having to rely on consultants or colleagues.

Document Repository Request

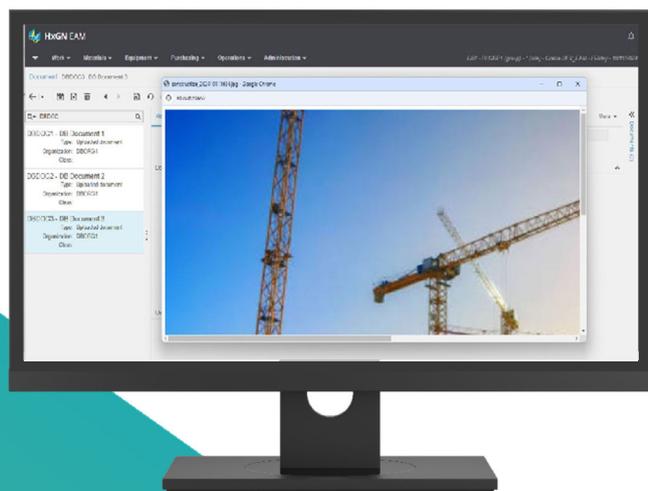

Respond to Real-Time Documentation Challenges Without Compromising Work Efficiency

With the enhanced Document Repository Requests feature in HxGN EAM 12.2., stakeholders across an enterprise can suggest and request document updates or initiate the creation of new documents. It also introduces a new screen that allows for an approval process before creating or updating a Document record. This feature simplifies the process of document management, transforming the day-to-day or regulatory compliance tasks of your workforce.

- Allows employees without document authoring permissions to request updates to existing documents or new documents, enhancing their workflow.
- Ensures document security and integrity with permission controls based on assigned or allowable class.

What's the Value:

1. **Enhanced Document Collaboration:** Stakeholders can directly request document updates, improving both efficiency and effectiveness.
2. **Maximized Security and Compliance:** The Approval Workflow module enhances document security and compliance with organizational protocols, while class-based permissions strengthen control in HxGN EAM.
3. **Empowered Workforce:** HxGN EAM's new feature allows all staff to impact the documents they utilize, promoting active participation and transparency for a high-quality, up-to-date document repository.

Enable workers to harness HxGN EAM's functionality on a powerful mobile platform. Access, capture and manage information, either online or offline, directly from the job site of service location.

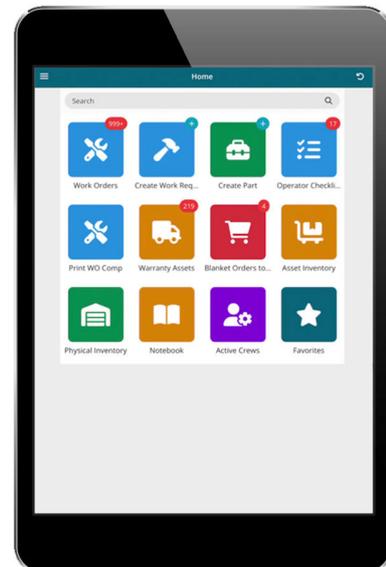

HxGN EAM Digital Work

Modernize and Make Key Work Tasks Much Easier

Modernize your work environment with the updated Digital Work layout from HxGN EAM. This refreshed layout option provides new, additional customizable menus and home screen in Digital Work Home Setup. This allows for easier navigation and improved efficiency, tailored to fit your business needs.

What's the Value:

- 1. User Assistance and Development:** With HxGN Alix, users can deepen their understanding of the product, learn new functionalities and keep up-to-date with ongoing enhancements. This leads to better utilization of the product, improved efficiency, and increased productivity.
- 2. Enhanced Efficiency and Autonomy:** HxGN Alix helps customers to be more self-sufficient. They can independently navigate the system, troubleshoot issues, and generate codes without having to rely on consultants or colleagues.

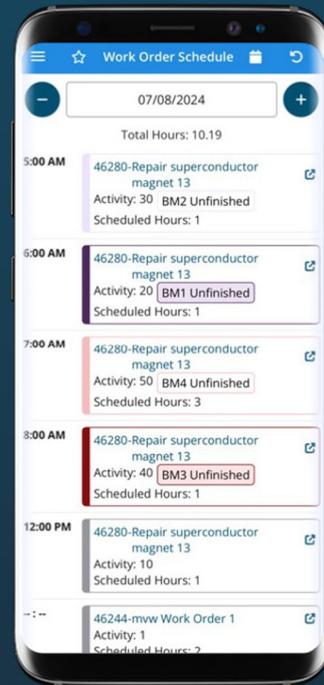

Work Order Schedule

The Work Order Schedule feature has been improved to make your work easier. You can now choose how to view your schedule: either in 'Calendar View' or 'Schedule View.' There are helpful links that let you access more information quickly. The 'Date' grid helps you easily navigate to planned work for specific dates. This feature is customizable for different assignment statuses and allows you to switch views smoothly.

What's the Value:

- 1. Enhanced User Navigation:** The redesign of HxGN EAM Digital Work's menus offers an intuitive user interface and customizable features for easy navigation and improved efficiency.
- 2. Customization and Flexibility:** The updates provide businesses with a flexible, touch-friendly solution tailored to their needs.
- 3. Efficient Work Order Management:** Users can now effortlessly navigate to work planned for specific dates for better management and scheduling.

Integration Templates with Databridge Pro

Stay Ahead in Your Organization's Digital Transformation Journey

In HxGN EAM 12.2, pre-built integration templates are now available for Databridge Pro. Given Databridge Pro's highly flexible and customizable functionality, these new templates now give users a place to start when integrating data from HxGN EAM to mission-critical applications. Not only do these templates offer a base-line to assist users in data integration, they also are fully customizable to cater to the unique needs of every organization. Currently offering integration templates for SDx and EAM Customer Surveys, new templates for bigger applications are in the works.

What's the Value:

- 1. Ease of Use:** The flexible and customization of Databridge Pro can often feel overwhelming. These new templates allow users to start integrating system data through the platform immediately.
- 2. Out of the Box Functionality:** These templates are ready to use right out-of-the-box. Integration can begin once adjustments are made to your specific environment.
- 3. Reduced Data Integration Time:** Spend less time setting up the system and more time integration platform data. These templates reduce time spent building integration points.
