

IBM Maximo

IBM Maximo is a market-leading Enterprise Asset Management (EAM) solution, consistently appearing in the upper right Gartner EAM Magic Quadrant. It is used by companies working in asset-intensive industries including mining, energy and engineering services.

IBM Maximo provides asset-intensive industries with systems to help improve safety, productivity and efficiency across all their critical assets. It incorporates applications for all aspects of asset management, including;

- Work Management
- Corrective, Planned and Predictive Maintenance
- Inventory Management
- Purchase to Pay
- Maximo Mobile

IBM Maximo brings these significant benefits to asset-intensive businesses:

- Improves the safety and reliability of assets and information while simultaneously providing control of costs
- Supports industry-standard practices to drive operational excellence
- Provides a trusted platform for managing all assets – from the smallest of tools to large, highly complex, business-critical assets.
- IBM Maximo integrates with the power of IoT data from people, sensors and devices, leveraging data to reduce unplanned downtime, increasing operational efficiency.
