

### Infor EAM enabled by Infor OS

Underpinning all Progressive TSL's Infor EAM implementations is Infor OS. This operating platform brings business processes to life, enabling ease of use across business functions wherever you are working.

#### Infor OS Features:

- Full integration to other systems
- Workflow approval
- The Ming.le app - for team collaboration
- Digital Document management
- AI Transparency

# Infor EAM

## Joined-up thinking for seamless, scalable asset management

#### Infor Best-of-Breed Solutions

Infor EAM is a functionally rich best-of-breed Enterprise Asset Management System. It joins up all your business functions across the full supply chain, maintenance and warehousing into one seamless solution. Infor EAM is the leader in the Gartner EAM Magic Quadrant.

#### Progressive TSL the implementation specialist

Progressive TSL are highly experienced at implementing Infor EAM to meet the specific needs of each client. Our dedicated team of experts follow the Progressive TSL EAM best practice framework to configure the system to meet the needs and drivers of your business. These frameworks have been developed and refined over many years to reflect both technological advancements and the changes in your industry. We also offer ready-built interfaces to other solutions within the Infor suite including SunSystems.

## KEY FEATURES OF INFOR EAM: SPOTLIGHT ON INFOR EAM IN ACTION WITH PROGRESSIVE TSL

### Infor Enterprise Asset Management

The Infor suite is a modular solution. The functionality can be delivered all together or as part of a phased rollout. Progressive TSL has implemented EAM for both large and small enterprises across the globe.

#### Key functionality:

- Maintenance Management
- Inventory Management
- Supply Chain Management
- Contracts & Tender Management
- Resource Management
- Analytics
- **All enabled by Infor OS**

Below are some use cases of how a selection of Progressive TSL's clients are using Infor EAM to optimise their asset management processes.

#### Maintenance Management:

Maintenance Management provides an aggregated view of the maintenance schedules and the life expectancy of all parts. This enables you to determine the least disruptive time to perform inspections and proactive maintenance, minimising downtime and maximising equipment efficiency.

Seplat Petroleum are a Nigerian owned Independent Oil & Gas Company and longstanding Progressive TSL client. They implemented Infor CMMS (Computerised Maintenance Management Module) to complement their existing Infor EAM modules and Infor SunSystems.

#### Key Benefits to Seplat:

- Capture historical data to prove and report on health & safety-related maintenance issues at Seplat assets across Africa
- Gather data to assess whether time and money was being well spent on assets across the company and make recommendations for future purchase requirements.
- View which equipment has frequent breakdowns and whether to spend more on improvement strategies and ameliorate downtime.

*"Progressive demonstrate an exceptional level of commitment to developing solutions that suit our needs and they frequently go the extra mile to ensure projects are delivered successfully"*

#### Edward Skene

Vice President, Finance and Business Support, Seplat Petroleum

For more information, please see the full Seplat case study

#### Inventory Management:

Inventory Management enables you to keep track of inventory (equipment and materials), in real-time across all your sites. It avoids needless purchase, transportation and storage costs. It facilitates an effective Purchasing and MRP policy, recognising shelf lives, lead times and re-order levels to reduce downtime as a result of running short of critical stock. All of which can make a significant impression on your bottom line.

Sparrows Group is a global provider of specialist equipment and integrated engineering services. Progressive TSL implemented a multi-language, multi-currency Purchase to Pay (P2P) solution for Sparrows, including inventory, contracts and tender management and workflow. Progressive have rolled out this solution across Sparrow's European, Middle East and Asian sites.

#### Key Benefits to Sparrows:

- Efficiency Savings through automation
- True inventory visibility with auditable workflow
- Better purchasing decisions
- Reduced approval cycles for operational and financial approvals
- Improved data security
- Mobile access to the system via any device

*"Progressive TSL have helped Sparrows Group to deliver a number of tangible cost savings through their Purchase to Pay Solution. Many of our manual processes have now been automated, and the mobile solutions provides approval access wherever people are working form."*

#### Brian Docherty

Head of IT & Facilities, Sparrows Group

For more information, please see the full Sparrows case study

#### Supply Chain Management

Good Supply Chain Management (SCM) ensures you can source, procure, receive and distribute required items to site in a timely and cost-effective manner encompassing both Procurement and Inventory management, in addition to the distribution process. Effective SCM will help companies cut excess costs, whilst ensuring business-critical functions are not hampered by the lack of important inventory items.

METSCO are an engineering services and management consultancy company working across a range of industries. Progressive TSL worked in partnership with METSCO to deliver a fast and robust finance, and supply chain solution (SunSystems alongside Infor EAM) to Oriental Energy while they were undergoing a significant period of change meaning they had to take on operatorship of a new asset quickly. At this critical time, Progressive TSL's expertise enabled a rapid, seamless transition to the new Infor systems.

#### Key Benefits to Oriental:

- Progressive's rapid implementation framework enabled Oriental to operate 'business as usual' within seven days of taking operatorship
- Fully automated purchasing
- Regulatory compliance

*"Working with Progressive TSL meant I had a trusted partner, rather than a supplier. In addition to their implementation and accounting skills, they proved to be a useful sounding board, and I was grateful for their knowledge and experience of oil & gas throughout our project together."*

#### Brad Daniel

Associate Partner, METSCO
